

The object and the aim of this thesis is to understand the Kingdom of God in a multidimensional model of reality that Karl Heim represented in his book *Glaube und Denken* (Belief and Thinking). The starting point of this work is a biblical glad tidings of God's Kingdom. The author is trying to do in the first part of this thesis at least a fractional analysis of the understanding of this message during a history and in the next part also the synthesis of its interpretations within the multidimensionality, which she is also striving to explain. The hypothesis of this work is that different interpretations of the Kingdom of God cannot be seen separately but simultaneously on the whole, in the light of the highest dimension, in the light of truth that is with God. At the end of this work is this hypothesis largely confirmed in interpretations of some theologians in the 20th century.
