Abstract

The present thesis Problems Faced by Beginning Teachers deals with the issue of beginning teachers and their problems in their first years of teaching. The aim of this paper is to identify key problems of beginning teachers. An analysis of scientific literature and other relevant documents, questionnaires and narrative interviews with beginning teachers were used to achieve a project objective. The thesis is divided into five chapters. The first chapter focuses on the concept of a teacher and their professional development. The second chapter describes teacher training, the third one deals with a role of mentors and the fourth chapter presents some potential problems that beginning teachers might face. The problems could be divided into several different categories, for instance, teaching problems, organizational problems, material and technical problems and social problems. The fifth chapter involves empirical research in the form of questionnaires, narrative interviews and my own introspection. The respondents are beginning teachers who are in their first five years of teaching experience.
