

## Abstract

The topic of my Diplome Thesis is Personal Education and its influence on the class climate at Primary School.

In the theoretical part i describe the class climate, its participants, types, approaches and methods of its research. Thereafter, I explore how to optimize class climate.

In the second part I describe the Personal and Social Edusation. I analyse the benefits of this croos- curricular topic, I split its contents on the topics and in conclusion, I analyse methodology principles and scheme of work with the aktivty of the Personal and Social Education.

In the practical part I do the initial diagnosis of the climate in my class. It builds long- term interventions implemented activities of the Personal and Social Education, which is topped off with the final diagnosis. The comparison of both of the diagnostics, where it is showed a very positive shift, it illustrates the influence of Personal and Social Education in the class climate.

## Key words

Primary school, class climate, diagnostics, Personal and Social Education, method, teacher action research
