

ABSTRACT

This thesis deals with monitoring of two raccoon dogs (*Nyctereutes procyonoides*) by camera traps at Prague minizoo Malá Chuchle in the period from February to May 2016. Activity and behaviour of both raccoon dogs is presented by charts and diagraphs for better understanding. Overview of Canidae family, its description and area, is included in this thesis.

KEYWORDS

raccoon dog, *Nyctereutes procyonoides*, activity, ethogramm, camera trap
