

Title of the Paper : Condition analysis for physical training teaching in Vysočina region

Abstract : This Paper is focused on comparison of conditions and possibilities of physical training teaching in Vysočina region at selected primary and secondary schools. Research data was obtained using the inquiry method at primary and secondary schools in eighteen selected towns of the region. The obtained data from twenty seven schools was mutually compared and evaluation of particular indicators was created.

The outcome of the Paper is detailed analysis of conditions in particular schools for physical training teaching. The analysis involves among others independent comparison of possibilities of primary and secondary schools, influence of the size of town on the level of the available equipment, comparison of the possibilities with regard to the founder of the school and comparison of the overall level of the facilities and equipment to the republic average. Attention was also paid to the present state of the equipment and facilities and the suitability to the physical training teaching.

Keywords: physical training subject, sport facility, equipment for physical training teaching, state of the sport facilities in Vysočina region, inquiry
