

ABSTRACT

The diploma thesis deals with the Evaluation of the Quality Management of the Educational Process at a University. The objective of the diploma theses is to report about current situation concerning the issue of the quality management evaluation at universities. The sources of the theses are specialized literature of Czech as well as foreign authors and especially the research of selected universities. The theses focuses on revealing the current state of the evaluation of the quality management of educational process. The theses provides an overview of the recommended content, to which the attention should be paid during the process of planning the quality management of the educational process and should thus help managers of schools and serve them as a practical guide for creating such a plan. The requirements needed for an analysis of the chosen topic are summed up in the theoretical part of the theses. The outcome of the theses is the analysis of the documents related to quality management at selected universities and the analysis of the research itself.
