

## **The abstract**

The aim of the bachelor thesis "Man as a Provider of Nursing Care", whether the men of the general nurse, health care and health care assistant, are concerned with gender stereotypes.

The bachelor thesis is divided into the theoretical and empirical part. The theoretical part briefly describes the history of the beginnings of nursing, where the role of the carer and caregiver was not as exceptional as today.

The following section describes gender stereotypes that concern gender in general and men who work as nurses.

The empirical part contains the results of the questionnaire survey, which was carried out by the men of providers - nursing care in the Motol University Hospital.
