My diploma work is dedicated to the dilemma of motherhood of women with hearing disability. The aim of this diploma work was to name the problème od the mathers with hearing disability (I am, in substantiate cases, working with the term parenthood, so that the role of the fater is not forgotten). My diploma work also endeavours for mapping of projects, which are offered to mothers with hearing disabilities.

First few chapter inquire into generál problematic of persons with hearing problems, and the following chapter are dedicated the centrál theme of the diploma wortk - motherhood of women with hearing disability - thus particular problems of mothers with hearing disability and projects, which are dedicated to those problems. The last part contains selected case studies of mothers with hearing disability and also interviews with the sign language interpreter and with a deaf parents'daughter. In the insertion, there are staten contacts of organisations, which are devoted to the problém I mention in my work.
