

The aim of my research work to learn if the amount of physical and sport activities and possibilities for the children in our kindergardens in Pardubice are satisfactory. The work was also focusing on meanings of the parents regarding the teachers' professionalism and ability to teach their children physical activities, and if parents prefer to use external sport specialists to cover sport-activities in our kindergardens. The result of my research work proves that children who are taught in Pardubice kindergardens have enough physical and sport activities, teachers are real professionals and external sport specialists would not be acceptable to supply pedagogical job in our kindergardens.
