

The historical development of Švabinského kindergarten in Havířov related to regional development

Abstract

My thesis focus on mapping the development of pre-school education connected with the foundation and construction of Havířov. For historical character of my thesis is used historical-comparative method, analysis and synthesis. Thesis shows the specific period from establishment of Havířov city in 1955 till today with focus on specific event - establishment of the Švabinský kindergarten, which was founded in 1965.

Using archival sources is documented the emergence and development of the city of Havířov and the development of its pre-school insistutions from 1955 till today.

The very first source is the school chronicles stored in the library of the Švabinský kindergarten, historical books about Havířov city and the region. The thesis points the specific period of this school, namely its development in period 1965-2016.

The thesis furthermore maps of the historical development of the region, its population and its development of the coal-based industry and the associated proccesing of raw materials.
