

ABSTRACT

My dissertation comes out of claim that the exploitation of library for children in kindergarten isn't systematically processed. But, it is apparent, according international research (PIRLS, PISA), that the existence of library for children has positive influence to the development of reading literacy. The objective of my dissertation was the charting of the role of libraries for children in kindergarten. The dissertation were finding out how the library for children are used in kindergartens. What we need to build up to the functional library was the next topic of my dissertation. Both main topics were examined in qualitative research. I used the design of case studying. I closely charted three cases of kindergarten where the library for children is used. It is needed to add relevant literature, interactive books and attractive books (inside and outside). This way brings perfect and full using of library. Apart of this, it is the same with the appearance of the library. It is essential to captivate with attractive and nice appearance by children and adults too.
