Abstract

The main theme is the activity of administrative and self-governing institutions in Mirošov from 1918 to 1950, the reconstruction of the office and the agenda of the municipal authorities and the activities of the office.

In addition, emphasis will be placed on the description of the function of self-government and city administration in the city at that time. Exploration of municipal self-government on the basis of historical research is a research topic that will bring the national past closer to the lowest levels of state administration and self-government. The various phenomena investigated often help us to understand both current attitudes and conclusions, which do not have to differ, even though it is divided by decades of years.

Key words

History of administration, National Committee, City Administration, City national Committee, self-government, Municipal Council, municipal office, mayor, election
