To Whom It May Concern

Varvara Ponomareva's Czech Teaching methods

Varvara has been teaching Czech to myself over the last few months. Over this period I have found her teaching methods extremely good for native English speakers.

Her methodology used to teach Czech (in particular for the Czech Cases) is better suited for foreigners than the standard Czech teaching methods. I have previously used a few other Czech teachers who tried to "force" the standard Czech teaching methods on myself. This did not work when the Czech grammar structure is so completely different to that of English.

I find that Varvara's tables, structure and methodology is far more intuitive for English speakers to grasp and understand. I value her approach and continue to find it useful as I progress with learning Czech.

Yours sincerely
