

**Abstract (in English):**

The main aim of this diploma thesis is to bring an edition of so called reports of parsons (relationes parochorum) of Radonice vicarage from the years 1676/77. In connection with that the thesis describes the origin of this historical source and the territorial development of Radonice vicarage from 1630/31 to the year 1700. The rest of the thesis focuses on some partial aspects of the relation between parsons and their patrons (privat chapells, reports on non-catholics and public sinners, parish schools).
