

Abstract

Title: Comparison of the factors determining the granting status of CSLH academy with academies in other countries.

Goal: The aim of the thesis is structure of the training process, players selection, conditions and testing, comparison of ice hockey academies in the Czech Republic, North America and Norway.

Methodics:

File for research:

Five hockey academies from different countries were selected. Representative of the Czech Republic was the HC Sparta Praha, HC Energie Karlovy Vary and HC Rytiri Kladno who holds status adept for academy of CSLH. The Notre Dame Academy was observed in Saskatchewan, and the fifth academy was Norwegian Lillehammer. The conditions, running and testing of players were explored. Questioning was done orally or by correspondence.

Conclusion: Although the compared results have their limits, it showed that Canadian Notre Dame is the most effective model for developing hockey players.

Key words: Ice hockey, academy, talent selection, testing, educational process
