

The diploma work " School Psychologist through Eyes of Basic School Teachers " is aimed at the problematics of a newly introduced advisory profession - the profession of the school psychologist.

In the theoretical part, the profession of the school psychologist is defined not only legislatively and ethically but is also demarcated from the other professions of psychology and the other professions of the school advisory system.

In the practical part, there are summarized the results of the research conducted to map the expectations of basic school teachers from a school psychologist.
