

Abstract

For my diploma thesis I chose the topic: Analysis of the problematics of the expulsion of Germans in the period press of 1945-1946. In the first part of the thesis I will focus on the methodology and the chosen type of analysis. Then, in the theoretical background of my work, I will interpret the development of the relationship between the Czechs and the Germans, I will try to describe in detail when the first conflicts between the two nations began. In addition, I will deal with the expulsion of the Germans as such, as well as its phases, taking into account the establishment of the system of internment camps, the decrees of the president of the republic and the views of both nations on the issue. In the last chapter I will deal with the analysis of the press from 1945-1946. My aim will then be to describe the discourse of post-war Czechoslovakia regarding the expulsion of Germans, the attitude of the powers on an international scale, but also the visions of the future Czechoslovak Republic, as it was established by then political representation.
