

Abstract

Title: The budget of the Czech Softball Association focusing both on individual budgets and their fulfilling of each representation unit

Objectives: The key objective of this bachelor thesis is to determine the revenues and expenditures of the Czech Softball Association's (further off as ČSA) budget in time, respectively from year 2010 till 2017, and identifying trends in dividing the budget into individual national teams. The priority is to answer the questions asked by the CEO of the ČSA, Gabriel Waage.

Methods: Methods of comparison were used in this thesis while comparing secondary data from separate annual budgets. After acquiring and analysing the resulting values, a structured interview with the CEO of the ČSA was done. Obtained information was thoroughly described in following discussion.

Results: According to the results of the analysis and information gained from the interview with the CEO of Czech Softball Association, I've come up with some recommendations that could be reconsidered before creating new budgets for following periods. I've mainly focused on the concept of justice in the financial distribution into individual national teams and also on the adequacy of goals which are expected from them.

Keywords: expenditures, revenues, justice, national team, softball
