

POSUDEK OPONENTA BAKALÁŘSKÉ PRÁCE

OPONENT'S REPORT OF THE BACHELOR THESIS

Oponent's name: Bc. Tomáš Modlinger

Leadership's name: Mgr. Ilona Kučerová

Student's name: Salem Baqhoum

The title of the bachelor thesis:
Physiotherapeutic Rehabilitation Plan for a Patient after Disc Herniation at L3/L4 with Radiculopathy.

The goal of the bachelor thesis:
The purpose of thesis is to explain a simplified manner the condition and the positive effect of physical therapy applied.

1. Volume:

pages of text	74			
	41			
number of references	articles	monographs	electronic sources	other
	8	20	13	0
others	figures	tables	graphs	appendices
	11	46	0	0

2. Seriousness of topics:	above average	average	under average	unsatisfactory
theoretical knowledge	x			
input data and their processing		x		
used methods	x			

3. Criteria of thesis classification:	degree of evaluation			
	excellent	very good	satisfactory	unsatisfactory
depth of analysis of thesis	x			
logical construction of work		x		
work with literature and citations		x		
adequacy of used methods	x			
design of work (text, graphs, tables)			x	
stylistic level		x		

4. Usefulness of the thesis outcomes: under average average above average

Design of work - teoretical part includes many paragraphs with only one reference. The thesis also contains many incorrectly written commas, what is quite disturbing in some parts. Several tables do not fit onto the page. Tables are unclear. Bachelor thesis as a whole - theoretical part contains sufficient amnout of informations. The case study is well designed, but contains several discrepancies. Range of motion examination is propably correctly written using SFTR method, but the description next to it is completely wrong. Post surgery and final examination do not include subjective patient's feelings. In every muscle strenght test table is written, that quadratus femoris is innervated by femoral nerve and m. quadriceps femoris is missing. Questions: How do we write goniometric examination using SFTR method? What type of currents are being used for electrostimulation? How do we do diaphragm test?

6. Recommendation for defence: NO YES

7. Designed classificatory degree VERY GOOD (according to student's presentation/defence)

Date: in Prague 31.8.2017
