

ABSTRACT

This diploma thesis investigates the extent to which athletes competing in 21st century world athletic competitions, ie OH and MS in athletics, violated anti-doping rules. The main aim is to find out which disciplines at the world's top athletics competitions, ie World Championships in Athletics and the Olympic Games, most frequently appeared in the 21st Century of Doping, and from which countries were athletes who contributed most to the use of doping. The secondary objective is to find out which prohibited substances or methods were most used in the athletic world competitions under study.
