

ABSTRACT

The diploma thesis „Kindergartens catering with focus on preschool age children“ is focused on the catering services of the facility. The thesis is divided into a theoretical part which included the development of the child, the dietary requirements of the organism at certain periods of life and, last but not least, the institution for upbringing and education of preschool age children-kindergartens.

The practical part of the thesis is devoted to the research in selected kindergartens. Institutions are selected to transcribe catering in the capital city, town and village. In the comparison of kindergartens, one kindergarten is selected in the particular location, where a survey was carried out.

The result of the survey is the filling of the consumer basket in selected kindergartens, which corresponds to decree no. 107/2005.
