

Annotation

In my bachelor thesis I deal with an analysis of the Nuremberg trial and judicial proceedings with protectorate government in the Czech press from October 1945 until October 1946. First I try to explain and describe the way to the Nuremberg trial and approximate the accused ones using professional literature. I did the same with the judicial proceedings with protectorate government.

In this bachelor thesis I describe the most important acts for a rise of a tribunal in Nuremberg. I derive a description of a statute of a court and points of indictment from the professional literature. The process is described in articles from a period printing and the information is folded by the professional literature. I choose the same procedure and style in the second part of my bachelor thesis with the process with the protectorate government.

The aim of my thesis is to analyze articles in the periodic press – Rudé Právo, Svobodné slovo, Lidová demokracie, Právo lidu, to compare a prejudice, style and a form of informing of an individual press
