

## **Abstract**

The bachelor thesis deals with the investigation of the activities of nurse anesthetist in general anesthesia.

The theoretical part is divided into several chapters and focused mainly on specialized education for nurse anesthetist, nursing activities in general anesthesia and safety in general anesthesia.

The empirical part of the thesis is focused on the identification and description of the main areas of nurse anesthetist activities during the operating program. In discussion there are determinations of time consuming of individual performances and activities performed by the nurse anesthetist.

The results of qualitative research show that the nurse anesthetist performs most of the preparatory activities and the clinical activities of nurse anesthetist are not less important when administering general anesthesia.

**Key words:** anesthesia, nurse anesthetist, activities of nurse anesthetist
