

## **Abstract**

This master thesis is focused on evaluating media content connected with 2017 government crisis and the influence of media ownership on that media content. The thesis analyses five major daily newspapers. Two of them were owned by Andrej Babiš, one of the two main characters of the crisis, before he put them into the trust fund.

The content is analysed by quantitative metrics which are further interpreted. The result of the analysis is, that the influence of media ownership can be observed. MF Dnes and Lidovky are overall more critical to Bohuslav Sobotka than to Babiš meanwhile for example Denik is much more critical to Babiš.
