Title of the diploma theses:

Rehabilitation after Anterior Cruciate Ligament Reconstruction

Aim of the work:

the thesis is divided into two different parts, theoretical part and practical part. In the former an overview about the anatomy, biomechanics and kinesiology of the knee is shown. In the latter we go through the practical application of my knowledge in order to treat and cure the patient after ACL reconstruction. Initial and final examination of the patient are described as well as the therapy applied and its effects.
