**Year of defense:** 2019

**Institution:** Charles University in Prague,  
Faculty of Medicine in Hradec Králové, Department of  
Social Medicine, Department of Nursing

**Name of author:** Eliška Horáčková

**Supervisor:** PhDr. Mariana Štefančíková, Ph. D.

### **Abstract:**

This thesis deals with the influence of nonverbal behavior, i.e. facial expressions and haptics, of the nursing staff on coping with the hospitalization. The theoretical part contains information on nonverbal communication in general and on its importance in nursing care. There is a detailed section on facial expressions and haptics, understood as a part of nonverbal communication and the main topic of this thesis. In the empirical part the author discusses with respondents their own perspective of the nonverbal behavior and perception of this type of care, using a semi-structured interview.

**Key words:** nonverbal communication, haptics, facial expression, psychosomatic, psychology in nursing
