

## Abstract

This diploma thesis is devoted to digital libraries of Czech regional libraries. Based on the available sources of literature and the questionnaire survey, the individual digital libraries that are built and administered by regional libraries are presented. In the first chapters of the thesis there is a terminological overview, the process of digitization itself and the digitization workflow. This is followed by a description of the distribution of personal representation of individual positions in digital libraries as well as the standards of digital libraries. An important part of the thesis is devoted to the results of the questionnaire survey among individual regional libraries and the presentation of the results of this survey. At the end of the thesis, the problem areas of regional digital libraries are outlined.
