

ABSTRACT

The objective of this thesis named *Abuse of drugs and forbidden doping substances in prison environment* is to map the problematics of drug misuse and doping substances in prison environment and to determine the level of presence of these substances in selected prisons in the Czech republic. The thesis is primarily intended for experts in prison services but also to the public as a material for drug usage in prison facilities. The first part is dedicated to theory of prison services in Czech republic, drug problematics in general and drug politics inside czech prisons. The second part describes research with goal of finding if there is a misuse of drugs or forbidden doping substances in prison environment and if so on what extent. The analysis of technical documents and expert questionnaire investigation are used for this work. Based on collected data and their analysis the stated hypothesis are verified. For the extension of this work it is recommended to follow the research and focus on the drug problematics in prisons from the convicted person point of view.
