

REFERENCE OF BACHELOR THESIS SUPERVISOR

Study program: SPECIALIZATION IN HEALTH SERVICE - Bachelor degree

Study branch: PHYSIOTHERAPY

Author's name:

Désirée Ginger Bertron-Simpson

Supervisor's name:

Michaela Stupková

The title of the bachelor thesis:

Case Study of Physiotherapy: Treatment of a patient after Arthroscopic Bankart Repair

The aim of the bachelor thesis:

The aim of the bachelor thesis: is to make an overview of the shoulder anatomy, kinesiology, and biomechanics and then present the patient's diagnosis, including the surgery. Special part is the case study, with respective examinations provided, treatments and results after providing all the therapies.

1. Scope:

number of pages of the thesis / text	94/83			
number of used sources	35			
number of used sources - English / foreign language	monographs	journals	others	
	9/0	26/0	0/0	
others	tables	fig./photos	graphs	supplements
	26	21	0	0

2. Formal and language level of thesis:

	excellent	very good	good	unsatisfactory
independence of the student in the processing of the thesis	x			
degree of fulfillment of the goal of the thesis	x			
work with literature, use of citation standard		x		
work editing (text, graphs, pictures, tables)	x			
stylistic level of the text	x			

3. Evaluating criteria of the thesis:

	degree of evaluation			
	excellent	very good	good	unsatisfactory
quality of the content and processing the theoretical part	x			
logical structure of the thesis and balance of chapters	x			
chosen examination techniques, design and their recording	x			
chosen therapeutic techniques, design and their recording	x			
ability to evaluate the intervention and interpretation of the results	x			
level of the work evaluation in relation to current knowledge	x			

4. Usefulness of the results of the thesis in practice:

above average average below average

5. Additional commentary and evaluation, questions for defense:

The author described in the theoretical part excellently the biomechanics and kinesiology of the shoulder joint and the view on the problem is really functional. She used all possible therapeutic technique (included PNF) to achieve the best effect in the patient. The effect of the therapy was presented clearly in the tables. Questions: Your opinion in the conclusion of examination was that the patient doesn't respond on the relaxation techniques applied on the m. trapezius. Could be the hypertonicity of this muscle caused by any long-term load?

6. Statement of the supervisor:

I declare that all referenced sources are properly cited or paraphrased in the thesis. The thesis was evaluated by the similarity test (SIS - Turnitin), and the similarity report is attached in the electronic documentation of thesis in SIS.

7. Recommendation for defense:

yes	yes-with-reservations	no
-----	-----------------------	----

8. Proposed classification level:

excellent - according defense
