

## **ABSTRACT**

The goal of my bachelor's work is to prove, that during the studying at the university I got many capabilities, which could not be obtained in the practise. The work has been divided into several parts, but all of them go in for the teaching profession of the professional training, and so even from the theoretic or the practical point of view. The part of this work includes the structured curriculum vitae, the technical essay, conspectus of the book according to one's own choice, the case school study, the written preparation for the pedagogical activity, finalized by the concluding consideration over the contribution of the study.
