Průběh obhajoby: The student started her presentation with motivation and attractiveness of the topic of fundraising and investment in Private Equity in Europe, along with a brief comment on the existing literature on this topic. She proceeded with the formulation of the research questions, difficulties of the task of gathering data from 20 European countries over the period of 2007 to 2018 and described the considered determinants and the data source. Then she described the difference between market statistics and industry statistics and described the basis of the Extreme Bounds Analysis which was applied to narrow down the number of determinants. Finally, she presented her results, addressed detail multicollinearity and further model assumptions testing and concluded her presentation with interpretation of her results with respect to the existing literature.

Then, the defense proceeded with the summary of the reviews, which, however, do not contain any suggestions for questions discussed during the defense. The defense concluded with questions from the members of the committee, in particular about the specifics and construction of the dataset and its representativeness and about the details of the Extreme Bounds Analysis method. All additional questions were answered satisfactorily.
