

ABSTRACT

The diploma thesis deals with opportunities of sport activities which primary school children have in the city Strakonice on primary schools, in Youth centre and out of these institutions. The theoretic part of the work shows us the knowledge which is related to the children in primary schools and theirs development and sport. The purpose is to establish the current offer of the sport activities and the offer in the process of ten years. The evaluation is performed on the basis of study of school educational programs, annual reports of schools and collected data are supplemented in the form of an interview with the school management. The tool for evaluating the results are graphs and the results show us how the offer has changed over the years and what sport activities are offered to the primary school children the most. The results also show us the differences that are across these institutions.
