Průběh obhajoby: The student made an outstanding presentation of her thesis. She provided a strong motivation for why her research question is interesting. She offered a compelling discussion of potential a priori predictions about the impact of student employment on educational outcomes. Her argument was convincing and it was well rooted in prior research. She motivated very well why performing a meta-analysis is suitable to study this research question. She provided a concise and well-focused description of several methodological approaches that she uses. The evaluation committee appreciated that the author used modern methods for performing a meta-analysis. The author provided a solid overview of her results. The committee would appreciate more numerical results in the presentation rather than providing a verbal overview of what the conclusions were. The author provided a convincing motivation for her original contribution relative to prior literature. She addressed the questions raised by her supervisor and her opponent. She provided convincing answers to the committee members' questions. Overall, the evaluation committee was impressed with the author's work and her performance at the defense and it nominates the author for the Deloitte Outstanding Thesis (DOT) Award.
