

Abstract

The aim of the master's thesis was the elaboration of the research of houses Nos. 45, 46 and 47, located in the historic area of the town of Most (in cooperation with Petra Kabeláčová). The preparation took place in two stages. In the first phase, primary data of the excavation in the 1970s had to be collected as a common basis for both works. The starting point was a comprehensive field documentation and inventory of artifacts, stored in the Oblastní muzeum a galerie v Mostě. The form of the inventory was gradually created during the inventory of material with a view to the time possibility of the assigned work. On this base, it was possible to determine the basic chronological sequence valid for research of houses Nos. 45, 46 and 47. The support was the chronological sequence created for the house No. 226. The second stage was individual. It focused on a selected thematic areas of Most archeology of the 13th to 16th centuries, on the culture of living and everyday life of the medieval city solved in connection with the research of houses Nos. 45–47. The second part of the work also showed other contextual levels, within the town of Most and the archeology of towns in the Czech lands and abroad.

Keywords

urban archaeology; medieval plots; housing; outbuildings; everyday life
