

This thesis is covering the problematics of the primary drug dependences. It is aiming at children in the age of 10 to 12. The objective of the work is the creation of programme being used by the basic and secondary school during the lessons of Family Education (eventually in the lessons of other subjects matters - i.e. The Civics etc). Also it's possible to use this programme in other institutions - e.g. centres of children and adults, children's homes, sanatorium etc.
