

Abstract

Title:

The notation analyses of goals during ice-hockey world championship 2021 in U20 category

Objectives:

The aim of this diploma thesis is to analyse goals scored in WJC 2021 and comparison countries. The second aim is to detect the biggest demerits of czech hockey from scoring viewpoint with the help of this facts and inspire other coaches to more intensive work agreed with world trend in this topic and the aim to return czech hockey to the best hockey countries group.

Methods:

The research was carried out by indirect observations 28 matches and 176 scoring situations through video records from WJC 21. The subject of research were 10 teams, that selected 88 scorers. Scoring situations were qualitative analyse. Gained findings have been written down into chart and were quantitative analyse.

Results:

The outcome of analyse is the most used scoring place Low slot - 0-10ft in front of the goal and with the most used location of successful shot-middle of the goal on the ice or close over the ice creates the most used way to score. From wrist shot-forehand side came the most of goals in WJC 21. Analyse proved demerits of Czech national team U20 in scoring by tip-in and rebound. The result of analyse also proved demerits of Czech select in power play and short-handed play.
