5. Additional commentary and evaluation, questions for defense:

This bachelor thesis is an excellent case of the very good approach to physiotherapy. The student proved to be a professional in therapeutic planning and cooperation with other therapists. He proved the ability to find a lot of interesting publications for formatting the theoretical part. All chapters are very logical and full of relatively new approaches in therapy. In the practical part, there is visible originality in therapy and thinking about patients possibilities. The student has a perfect motivation to be a physiotherapist, and I recommend his thesis for defence.
