

The unemployment has appeared as a new phenomenon in Czech Republic after year 1989. The aim of my work is to provide general information of this phenomenon, described it both from economical and personal (psychological and social) point of view. The personal impact of unemployment was the one of the reasons for establishing Job klub within Proxima Sociale. The service was established in the beginning of the year 2004 and since autumn 2004 has been co-financed by European Social Fund. The second chapter is dealing with development of Job klub and description of its current status. General description (mission, activities, personal, etc.) as well as the specifics of some activities – sheltered employment, course “How to succeed in the employment market” is provided. The evaluation questionnaire was used to illustrate the feed back from the clients. The feed back was the basement for blueprint the possible ways of Job klub future development.
