

I am trying to summarize life and theological work of Johannes Hempel till 1945. He was interested in special topics of Ethics of ancient Israel and Questions of profetic literature. By my research I was trying to include life and work of Johannes Hempel in his era and theological schools, define his work and compare it with other Old Testament scholars of his era. With reference to political situation of contemporar Germany (NS Regime) I prefer to accent Hempel's political ideas and engagement. At the end of my work I was trying to reflect validity and applicability of Hempel's concepts in relation with the newest research of Old Testament.
