

REPORT OF BACHELOR THESIS

Leadership's name: Mgr. Agnieszka Kaczmarek

Student's name: Inessa Lichterman

Title of diploma thesis name:
Wrist fracture

Goal of thesis:
Aim of the thesis was introduction of questions of wrist fractures. The thesis is presented as theoretical part and special part with case study of the physiotherapeutic care in patient with Smith fracture of wrist.

1. Volume:

* pages of text	64
* literature	23 (from which 8 are internet sources)
* tables, graphs, appendices	23 tables, 11 figures, 1 supplement

2. Seriousness of topics:

	above average	average	under average
* theoretical knowledge		x	
* input data and their processing		x	
* used methods		x	

3. Criteria of thesis classification

	degree of evaluation			
	excellent	very good	satisfactory	unsatisfactory
degree of aim of work fulfilment		x		
independence of student during process of thesis			x	
logical construction of work		x		
<i>In theoretical part I suggest deeper description of kinesiology and pathokinesiology after wrist injuries and possible therapeutic possibilities to improve coordination.</i>				
work with literature and citations			x	
adequacy of used methods		x		
design of work (text, graphs, tables)		x		
stylistic level		x		

4. Usefulness of the thesis outcomes:

under average	average
---------------	---------

5. Comments and questions to answer:

When to use parafine in posttraumatic states? Why?
How changed function of wrist can relate to shoulder girdle problems?

6. Recommendation for defence:

YES	NO
-----	----

7. Designed classificatory degree

according to the defense
