

The supervisor's review

Diploma work: **Towards a Better Understanding and Application of Physical Education and Sport – High Hopes**

The author of the work: Konstantinou Panagiotis

The supervisor: PhDr. Irena Martínková, PhD.

The main topic of the diploma work is the critique of sport and suggestion of a new approach to it through the promotion of play. The author takes this topic as a very important one to deal with in the present time as he sees the sport not to fulfill the task of promoting joyful and meaningful life of its participants. Though his recommendations are sometimes too idealistic and need rethinking, when writing his thesis, he showed great personal engagement and commitment.

The diploma work satisfies the requirements for such a type of work.

I recommend the diploma work for defense.

2.5. 2008
