Jméno studenta, studentky	<b>Samar J. Nabbout</b>
Jméno vedoucího diplomové práce	<b>Prof. RNDr. Luděk Jahodář, CSc.</b>

## I. Posudek vedoucího diplomové práce

Ms. Samar Naboud has started a diploma thesis stay at the Department Pharmaceutical Botany and Ecology on the third semester of their study. She also spent a one semester Erasmus stay at Faculty of Pharmacy, University of Helsinki, in laboratories of the Division of Pharmaceutical Biology. Their diploma thesis theme was focused on secondary metabolites of the Bohemian moss taxons and anti-oxidant activity of them. She is hardworking, intelligent, and a self-starter who generates her own resaerch ideas. At the same time, she is open to the advice of their thesis tutor. The results of their experiments have been published partially in the two impact scientific journal Fitoterapia (Elsevier, Milan) and were processed to the excellent Master's thesis.

I recommend the thesis for defence.

Navrhovaná klasifikace **excellent**
