

The bachelor thesis focuses on the issue of homelessness in the elderly. It is divided into theoretical and research part. In the theoretical part, I dealt mainly with old age, physical, mental and social changes in old age. I also focused on poverty in my bachelor's thesis.

And then I introduced the reader to the issue of homelessness in general. The first part of the practical part contains semistructured interviews that describe the lives of respondents (seniors with experience of homelessness). The second part consists of an analysis of the already mentioned interviews. The aim is to find out the cause of homelessness in senior age and living conditions on the street.
