

## **Abstract**

This bachelor thesis consists of two parts. The first part is a translation of two selected chapters from the book *Hydrotherapie bei Hunden: Fit und gesund durch therapeutisches Schwimmen* written by Sabine Baumgartner and Sabine Zemla. The translated chapters explain what hydrotherapy is, which methods of hydrotherapy are used and show examples of individual patients and how they were treated. The subject of the second part is a theoretical commentary, which consists of the original text analysis based on the model of Christiane Nord, description of translation method, translation problems and translation shifts which were used in the translation.
