

The aim of my thesis is to introduce the Roma ethnic group living in Spain from the point of view of their life and education. Describe some projects focusing on improvement of their employment in Spain and in the Czech Republic. The theoretical part would be devoted to brief interpretation of the history of Roma people living in Spain and the characteristics of their culture and language and will describe the current system of education in the territory.

The practical part of the thesis will be devoted to the characteristics of particular school located in Huelva, part of the autonomous region of Andalusia, and the projects for improvement in education and employment of Roma in Spain and in the Czech Republic.
