

Diploma work „Expoundation of key competentions for problems's solving in activity centres Step By Step Programme " is centred on the activity centres theme in Step By Step Programme and on the question, in which way is it possible to expound key competentions, particularly competention for problems's solving.

Theoretical part describes today's approach to school teaching in connection with The European trend of training and education. It presents the Step By Step Programme, its bases, policies and fundamentals. It charts the idea of activity centres with historical connection and decribes its approach to the Step By Step Programme.

Practical part results from the problemacy of key competentions integration to the school training. Operational investigation proves by evidence the way to their integrating in activity centres use of the Step By Step Programme at one of the primary schools in Prague.
