

I. Název bakalářské práce:

Foundation and building history of St. Nicholas Church in the period of top and late Middle Ages and early modern period in the town České Budějovice¹

II. Anotace:

In my work I deal with not only the oldest period of building of St. Nicholas Church in the town České Budějovice in the 13-th and 14-th century, but I include new information into regional and church- administrative context. According new connections from literature written and non-written sources and new information I divide the building history into 3 periods connected with economical power and policy of town and reformatory transformation of the Church. The first period defines years 1265-1279, i.e. beginning of building the Church and date of it's interruption of money shortage. Maybe before 1297 was consecrated not finished. The second period defines years 1297-1335 and during this period was building of the Church. Last period is after 1335. And since that we have big source fund showing us Church area, altar beneficous and stay of clergy. We can see, that these historical periods are connected with economical and political power, which after 1265 looked for it's home. In the next part of my work I deal with foundation of town rectory, which was consecutive created besides much older, non-town rectory. The centre was in the Church of St. John Baptist in area which was named Budowitz. The aim of my work is to carry out research the period of the 13-th and 14-th century of important St. Nicholas Church in the town Česke Budějovice.

¹ Vznik a stavební vývoj chrámu sv. Mikuláše ve vrcholném a pozdním středověku a v ranném novověku v rámci města České Budějovice.
