

Abstract

This diploma paper was devoted to analysis of contemporary system of central banking in Ukraine and its comparison with system of central banking in the Czech Republic.

This diploma paper consists of history the following parts: central bank in Ukraine, functions of central bank in Ukraine, position of central bank in Ukraine and Czech Republic, financial crisis in Ukraine. In the beginning there is information about historical past of Ukraine, where significant events that influenced banking system in Ukraine are explored and analyzed. The following part compares systems of central banking in Ukraine in the past with systems of central banking nowadays. Also, you can find information and analysis on current situation in Ukraine's central banking with its objectives, implements and goals.

Last part of this diploma paper is devoted to differences between Czech and Ukrainian systems of central banking. The conclusion that comes from comparisons and analysis of systems of central banking of selected countries is that system of central banking of the Czech Republic is much further developed than Ukrainian. The main differences are transparency of Czech central bank and people's confidence in it, instruments of monetary policy, cooperation with executive authorities of the country, licenses for private banking operation

Last section of this diploma paper is devoted to systems of central banking in the countries of former Soviet Union. Extended research shows that the best situation from all the countries is in Russia. This country not only has one of the biggest foreign exchange reserves in the world but it also seems to implement most appropriate solutions for overcoming crisis from all the researched countries.

This diploma paper gives complete overview about system of central banking in Ukraine and will be useful not only for companies that are planning to carry business in Ukraine but also for those who are interested in economy of this East European country.
