

My Diploma Paper is concerned with the Teacher s Organizations and their Function in reformativ Efforts from 1918 till 1938. This Paper speaks about structure and ideas of the teacher s Organizations. The Work focus on some themes namely: Reform of teacher s education, possibilities of cooperation among Teacher s Associations and so-called „Přihodovskou“ reform. The Paper treats of the situation in the German language area and in Slovakia and also of course in Czech Associations. The Work is based on analysis of press from 1918 till 1938, which provide the presentable summary about ideas and positions of the most important Teacher s Organizations. The Diploma Paper pointed to the fundamental importance of Teacher s Organization for reformativ Efforts in Czechoslovakia. The Teacher s Associations were big Organizations with wide activities (such as: social, promotive, educational, tutorial) and they substituted for the role of country (f.e. the Foundation of privat university). The weak point was variety of corporative interest, which didnt make possible to collective cooperation.
