Diplomová práce

ANNOTATION

### ALTERNATIVE EDUCATIONAL SYSTEMS IN CZECH REPUBLIC FROM CATHOLIC POINT OF VIEW

Topic of thesis is a view of alternative educational systems in Czech republic. There are described waldorf, montessori and dalton schools, which have been established in Czech republic since 1990. Thesis tries to map their history and present. Very important is effort to find their basic ideals, their general principles, requirements to teachers and last but not least to describe teaching of religion on these schools and also compare them together. A part concerning to Christianity and pedagogy tries to find elementary view of church to education. Comparing them with Christian anthropology afterwards tries to find solutions for catholic attitude, that shall be enough unprepossessed and balanced.
